

Dear

Thanks to City Council and the Mayor for helping change the wording of the 1931 Tidelands Grant. We now hope you'll create a marine mammal park to give the seals more protection and make Casa Beach a place where everyone can enjoy seal watching without disturbing the animals. Please close the beach during pupping season and at night. For the rest of the year, it would be wonderful to have the rope line up. Seals are wild animals and we can't expect them to rest peacefully when people go on the beach.

You can make great things happen for San Diego and the City can become a world-class tourist destination. The City could also benefit economically from increased tourist dollars. If planned well, an increase in the number of tourists doesn't have to mean mass congestion of local La Jolla streets. Please do right by those who live in La Jolla so it can maintain its current character.

We applaud you for past efforts, but there is still much that can be done in City Council chambers. Please represent your constituents, the majority of whom want the seals to be protected.

Sincerely,

Name
